Frame insert exchange for NOVA plansifters – Buhler’s service offer for a fast and easy maintenance of your plansifters.

Assure a high uptime of your plansifter and thus prevent unscheduled downtimes of your plant. When a sieve has been worn down, this immediately becomes evident in the degradation of the product quality and yield.

Scope of service
Buhler will supply the covered frame inserts in the accustomed top quality according to your specific needs. Our services include:
- Supply of the covered frame inserts
- Carefully prepared frame inserts thanks to wear-free processing
- Sieve fabric of accustomed Buhler quality
- Uniform bonding by automatic bonding machine

Return of the covered and used frame inserts
- Removal of the old covers and adhesive remainders
- Preparation for installation of new sieve covers
- Stocking until next application

Your benefits
High uptime
- thanks to fewer unscheduled mill stops due to defective flour sieves

Consistently high product quality
- thanks to preventive flour sieve changes

Optimal flour sifting action
Maximum product yield
- thanks to optimal condition of the flour sieves and sieve cleaners

No capital spending
- on spare frame inserts

No tie-up of resources
- for installing and removing the covers of frame inserts
NOVA frame inserts.
Plansifters MPAG, MPAH and MPAJ.
