

Novapur Intro. Adapter frame to Pneumapp tensioning device.

For stainless steel insert frames (Novapur).

Preventive
maintenance for
high economy.

Grain Processing
Customer Service

Novapur-Intro adapter frame for tensioning device allows for a perfect service.

This sieve cover tensioning adapter has been specially developed to allow the covers of stainless steel frame inserts of Novapur sieve stacks to be installed.

This enables also stainless steel frame inserts of the Novapur generation to be processed on existing tensioning devices in the accustomed high quality.

Buhler would be happy to do the servicing work on your sieve frames and frame inserts for you.

Please don't hesitate to contact your Buhler service partner.

Please note, we highly recommend the **NovaFix** (UVB-26000-030) adhesive for stainless steel frame inserts applied for covering new frames.

Your benefits
